- I've just noticed that currently all employees are using the same nickname and password to access the app. However, this wasn't what I had in mind.
- Each employee should have individual access to their own account, with unique credentials — this is essential for data accuracy, security, and proper tracking of work hours per person.
- As previously discussed, I would like the system to automatically generate a nickname and password for each new employee upon creation.
- For example:
- Nickname: employee's name, or e-mail
 - Password: employee's tax identification number, or whatever I will read myself here.
- So basically when I add one employed him will receive it automatically the nickname and password and phone.
- To clarify this setup, I'll send you a screenshot where this functionality is marked, so you can better visualize how it should work.
- Please let me know if this adjustment can be implemented soon or if you need anything else from my side.
- Best regards,
Daniel Purcaru

- Hello Daniel,
- I hope you're doing well!
- I'm glad to let you know that your app has now been successfully published on the Apple App Store.
- When we delivered the project earlier, the app hadn't been published yet on the Apple Store, and you had a concern about this issue with Support, which is why Fiverr temporarily hold the project p_ayment option.
- Now that everything is complete and the app is officially live, it would be great if you could kindly confirm to Fiverr Support that the app has been published, so they can proceed to release the p_ayment accordingly.
- Also, if you need any adjustments or modifications, then you can share them with me anytime.
- Thank you so much for your continued trust and cooperation it's always a pleasure working with you!

- Thank you for the update regarding the publication of the iOS app.
- I will now proceed to inform the Fiverr Support team that the app has been successfully published and that the project is considered complete on that side.
- I also wanted to ask:
- Has the Android version of the app already been published on the Google Play Store? If not, could you please let me know the current status?
 - Will the remaining issues I raised earlier — particularly regarding admin dashboard access and individual login credentials for employees — be addressed soon? These are important aspects for the proper functionality and scalability of the system.
- Looking forward to your feedback.
- Best regards,
Daniel Purcaru

- Hello Steff,
- Thank you for your message.
- I'm writing to confirm that the order with freelancer amazui has now been successfully completed. The mobile app TR and Project is live on the Apple App Store, and I'm satisfied with the work delivered.
- Please feel free to proceed with releasing the payment to the freelancer.
- If any adjustments are needed in the future, I will reach out directly.
- Best regards,
Daniel Purcaru

<div>  <div>danielpurcaru</div> </div> <div> <p>Subject: Issue with Attendance Data Not Being Saved on Dashboard</p> <p>While testing the application, I encountered an issue in the admin dashboard, specifically under the "Attendance" menu.</p> <p>When I manually input working hours for employees, the system seems to accept the data. However, once I navigate away from the menu and then return, the hours I entered are no longer displayed – as if they were not saved.</p> <p>I've attached some screenshots with the relevant areas highlighted to help you better understand the issue.</p> <p>Could you please investigate this behavior and confirm whether it's related to a saving error or a problem in the database? Can you check this one with your team? Thank you in advance for your support.</p> <p>Best regards, Daniel Purcaru</p> </div>	<div>  </div>	Oct 07, 5:59 PM

<div>  <div>danielpurcaru</div> </div> <div> <p>Sorry to disturb you again</p> <p>I have one employed with android phone how him can use the app, in this moment he cannot install it. Can you help with this situation?</p> <p>Thanks a lot</p> </div>		Oct 07, 7:11 PM
<div>  <div>Me</div> </div> <div> <p>no worries at all – happy to help!</p> <p>If your employee is unable to install the app, it's likely because Android blocks apps that are not from the Play Store by default. Here's how to fix it:</p> <p>Option 1 (Recommended):</p> <ol style="list-style-type: none"> 1. Download the APK file again from this link: [insert same Drive link]. 2. When prompted, choose "Download anyway" if a warning appears. 3. After the download, open the Files app → go to Downloads → tap the APK file. 4. If Android shows "install blocked", tap Settings, then enable "Allow from this source" (or "install unknown apps"). 5. Tap Install again – the app will install successfully. <p>Option 2 (if Play Protect blocks it):</p> <p>~ Tap "More details" → "Install anyway" – this is just a standard Play Protect check since it's not from Play Store.</p> <p>Once installed, he can log in using:</p> <ul style="list-style-type: none"> 👤 Username: e1 🔑 Password: t2345678 </div>	<div>  </div>	Oct 07, 7:20 PM
<div>  <div>danielpurcaru</div> </div> <div> <p>Subject: Android App Installation and Google Play Availability</p> <p>Hello,</p> <p>Thank you for the detailed instructions regarding the APK installation.</p> <p>However, unfortunately, our team and employees are not familiar with manual APK installations, and many of them may find this process too technical or confusing.</p> <p>Could you please let us know when the app will be available on the Google Play Store, so that it can be installed directly and easily, just like the iOS version?</p> <p>This would make it much more practical for everyone involved.</p> <p>Looking forward to your update.</p> <p>Best regards, Daniel Purcaru</p> </div>	<div>  </div>	Oct 07, 9:35 PM
<div>  <div>Me</div> </div> <div>Okay.</div>		Oct 07, 9:42 PM
<div>  <div>danielpurcaru</div> </div> <div> <p>Subject: Working Hours Not Showing as Registered</p> <p>Hi,</p> <p>One of the workers submitted his working hours, but they don't appear as registered in the dashboard. Could you please check what might be causing this?</p> <p>Best, Daniel</p> </div>		Oct 08, 2:24 AM
<div>  <div>Me</div> </div> <div> <p>Sure, I will check on this and will take care of this and keep you updated once we sort this out.</p> <p>Thank you.</p> </div>		Oct 08, 2:27 AM

 **danielpurcaru** Oct 08, 10:48 PM
Hello
Any news?

 **Me** Oct 08, 10:55 PM
Nothing for now. I will provide you an update by tomorrow.

 **danielpurcaru** Oct 08, 11:00 PM
Okay, thank you very much. I'll wait tomorrow.

 **Me** Oct 08, 11:42 PM
Okay. I will update your soon.

 **Me** Oct 09, 11:07 AM
Hello Daniel,

I hope you're doing well. To proceed with updating your app on the Google Play Store, we kindly need full access to your Google Play Console account. We still cannot find full access in Google Play Store for the updated app. This access is required so we can manage the app configuration, upload the latest build, and submit the new version for review and publishing.

Once the invitation is sent, we will immediately move forward with updating the app and notify you as soon as it's completed.

Thank you very much for your continued cooperation and trust.

Best regards,

 **Me** Oct 09, 12:09 PM
Hello Danielpurcaru,

Just a quick note, when you're updating attendance from the dashboard, please make sure to select the specific project first before submitting the update.

This will help the system record the attendance correctly under the right project.

If anything seems unclear or you face any issues while doing it, just let me know and I'll be happy to help you out.

Thank you for your cooperation!

 **danielpurcaru** Oct 09, 11:07 PM
Hello

I have a small problem with some validation on my account on Google, now I solve it so it have to be right, you can try to publish the app see if it's working if not let me know.
Thanks

 **Me** Oct 09, 11:12 PM
Thanks for letting me know. I will share this with my team and will try to publish. I will send you an update tomorrow.

 **danielpurcaru** Oct 09, 11:13 PM
Thanks

 **Me** Oct 09, 11:13 PM
You are welcome.
