Hello Rachad,

Thank you for sharing the finalized Figma design for the Deliver App. I'm excited to begin turning it into a fully functional mobile app using Flutter. Scope of Work:

- Convert all Figma screens into Flutter interfaces, ensuring responsive design across iOS and Android.
- Implement interactive elements, smooth transitions, and navigation.
- Integrate static or dynamic content (if applicable) and manage state efficiently.
- Perform cross-device testing and ensure smooth performance.

Post-Development Support:

- Provide 30 days of support, including bug fixes and minor updates.
- Deliver code with documentation for future updates.

Timeline: 25 days for full development, with 5 days for testing.

Pricing: \$900 USD for development, testing, and post-launch support.

Please review and confirm if everything aligns with your requirements. Once approved, we can start the development process and provide regular updates.

Looking forward to working with you.

I've prepared a short meeting summary document based on our recent discussions and progress updates—you can find it attached here:

Meeting Summary  
Date: 10/06/2025

We talked briefly about the project and agreed on the below points about the Deliver app, for which we are going to start backend development:

The price range for every vehicle car/truck should be €1.00/km + 30% surcharge. The temperature range includes a plus button by which the shipper can input his custom temperature range.

The freight type while creating an order is not needed.  
UX prototyping is currently ongoing, and once it finishes, the full-fledged development can be started with the clear requirements.  
Marketplace payment can be implemented using Stripe.  
Full AI integration planning will be communicated to the dev team soon.

Clients are going to analyze the full project, business logic, payment method, and their requirements to finalize their product. They are also willing to come to a meeting soon to clarify these project requirements.

It highlights the key points, current status, and next steps for the project so we can stay fully aligned.

We will take some time to review the prototype and all, and soon we will be reaching you, and we may sit in on a meeting about starting the development process. Looking forward to your feedback and the next step.

 abdelrahman875 sent you a message Oct 13, 2025, 10:46 PM

Hi Md. Eshrak,  
I just wanted to let you know that from my side, the prototype is fully completed — everything is clear and ready to move into the development phase.  
Please make sure to follow exactly the structure and flow shared on Figma, there's nothing else to add for now.  
The only thing remaining will be the Admin Panel, which I'll prepare and send to you by next Monday.  
Regarding the payment system, I want it to be fully automated, so that transactions flow seamlessly between the shipper and the transporter.  
Also, please send me the payment links so I can proceed with the payment directly.  
About the note mentioning that the "freight type is not needed," I just want to clarify that the two buttons (Fret and Express) should remain visible:  
Fret = standard delivery mission  
Express +30% = faster delivery  
What I meant earlier is simply that I'd like to change the boat icon to something more suitable (like a truck or a delivery symbol), since the current one looks like it's for overseas shipping — but nothing changes functionally.  
Everything is properly connected in Figma, so there should be no issues following the prototype.  
If you need any additional clarification, we can schedule a short meeting — but from my end, everything is perfectly ready.  
Best regards,  
Abdelrahman

 You sent a message Oct 13, 2025, 10:56 PM

Thanks for the update. I'll follow the Figma structure as instructed. I'll also update the icon as requested. Looking forward to receiving the Admin Panel on Monday to proceed.

 abdelrahman875 sent you a message Oct 13, 2025, 11:16 PM

That's perfect!  
You can already start working on the frontend part.  
We'll send you the Admin Panel prototype on Monday.  
Please make sure to follow the Figma prototype carefully — every button is already linked to its corresponding screen, so just replicate it exactly as shown.  
Everything should go smoothly, and there shouldn't be any issues.  
Best,  
Abdelrahman

 You sent a message Oct 13, 2025, 11:23 PM

Thank you for the clarification. I will begin working on the frontend as per the Figma prototype and ensure everything is implemented as outlined.

Looking forward to receiving the Admin Panel prototype on Monday to proceed further.

 abdelrahman875 sent you a message Oct 13, 2025, 11:47 PM

Perfect, no problem!  
Please don't forget to send me the payment link for the AI APIs so I can proceed with it.  
Thanks again!  
Abdelrahman

Hello Abdelrahman875,

I hope you're doing great.

I've prepared a short meeting summary document based on our recent all discussions till – you can find it attached here:

[https://docs.google.com/document/d/16uQ0khiDUT2P6Zx8-wXfT1qWau1SK1\\*3UeDgl0niM1A/edit?tab=t.0](https://docs.google.com/document/d/16uQ0khiDUT2P6Zx8-wXfT1qWau1SK1*3UeDgl0niM1A/edit?tab=t.0)

It highlights the key points, current status, and next steps for the project so we can stay fully aligned.

Hope to see you on a final meeting with our full team about starting the development milestone with a clear idea and requirements.

Looking forward to your feedback and next step.

Oct 17, 2025, 4:45 AM

Hi Md. Eshrak,

I hope you're doing well.

I just wanted to confirm that the Figma prototype you currently have is the final version, and I would like you to follow it exactly as it is.

I've spent a lot of time and effort refining every screen and flow, so please make sure the app looks and functions exactly as shown in the prototype – no changes or adjustments are needed.

Also, as I mentioned before, please send me the direct payment links for purchasing the API keys (OpenAI, Google Maps, and Stripe).

So far, I've only received documentation links, but I need the actual payment links to complete the purchases.

Regarding the Admin Panel, the UI design will be ready and shared with you by Monday.

Until then, please keep all buttons and features as they are in the prototype, and follow the Figma structure step by step.

That version represents exactly what I expect to see in the final application.

Thank you for your understanding and cooperation.

Best regards,

Abdelrahman

Thanks for sharing the detailed clarification regarding the lesson summaries. Let me review the requirements and pass them along to my team for further analysis. I'll get back to you with a detailed response shortly.

Looking forward to ensuring everything aligns with your expectations!

Perfect, I trust you. Please do your best, Eshrak – I'd like it to look as close as possible to what I shared in the prototype.

Barak Allah oufik, salam alaykum.
